

Mr. Brevard has been the president and only owner of AC'CENT Environmental Services, Inc. located in Lufkin, Texas for 33 years. AC'CENT provides complete tank management including all record management for PSTs such as release detection testing (EPA third-party certified GAS SYSTEM® monthly vapor monitoring, Veeder-Root Distributor for Automatic Tank Gauge Systems, EPA third-party certified SIRmadeSIMPLE™ monthly statistical inventory reconciliation - SIR), Line leak detector tests, corrosion rectifier tests and corrosion surveys, corrosion system installation and repair, ASTM 1527 Phase I assessments, pollution and third-party liability insurance and compliance audits. All test methods have EPA third-party approval which is available upon request.

Mr. Brevard is currently on the National Petroleum Equipment Institute Committee which authored the Recommended Practices for the Testing and Verification of Spill, Overfill, Release Detection and Secondary Containment Equipment, PEI/RP1200. This is a national and industry standard used by EPA and all state agencies.

Mr. Brevard is currently on the National Petroleum Equipment Institute Committee which is authoring the Recommended Practices for Closure of Underground Storage Tanks and Shop-Fabricated Aboveground Storage Tanks, PEI/RP1700. This document will be the national standard for proper protocol in permanent removal of petroleum storage tanks in the United States.

Mr. Brevard is also co-author for the guidance document utilizing corrosion practices on tank type verification published by the Steel Tank Institute. He also provides training in inventory reconciliation and other PST related consultation services and is considered an international expert in soil gas analysis. He is an active Texas EnviroMentor and has donated many hours of service to the TCEQ SBLGA programs and the people of Texas.
