

TRRP Training: 2026 Program

presented by: GSI Environmental Inc.
 sponsored by: Texas Association of Environmental Professionals (TAEP)

The Texas Risk Reduction Program rule (TRRP; 30 TAC 350) establishes consistent, risk-based performance standards for the assessment and response to releases of chemicals of concern to the environment.

GSI's popular and informative training course is a must for environmental professionals who need a working understanding of TRRP and the latest TRRP guidance and policies, as well as attorneys who may encounter environmentally impacted properties as part of their legal practice.

TRRP Training Course (2 Days): Provides an overview of the TRRP framework and step-by-step training on property assessment and response action procedures established under the TRRP rule.

Attendees will become acquainted with rules, key guidance documents, and agency policies covering affected property assessments, protective concentration levels, and response actions. The course material presents strategies for efficiently navigating and complying with the rule.

Sponsored by:

Texas Association of Environmental Professionals (TAEP)

TAEP is the premier organization for environmental professionals in the State of Texas. The goals of TAEP include the advancement of the environmental profession and the establishment of a forum to discuss important environmental issues. TAEP members receive a 10% discount. Please email president@taep.org to receive the discount code.

This course qualifies for:

- > 15 professional development hours for PE/PG continuing education
- > 12.5 accredited MCLE hours for Texas State Bar continuing education
